Applying to UL

Student Vetting and/or Fitness to Practice where required

Certain courses require students to undergo student vetting due to the external placement which may bring the students into a position of trust and may involve unsupervised access to students and/or vulnerable adults. Offers of a place on these courses will be provisional pending the outcome from the student vetting process and/or Fitness to Practice where required.

Fitness to practise means having the necessary skills, knowledge, health and character to undertake and complete a programme safely and effectively.

Competitive entry

Due to the number and calibre of applicants, qualified candidates to all undergraduate degree courses, who satisfy the minimum and specific entry requirements outlined above, are placed in order of merit based on a points system.

The system operates as follows:

- Points are awarded for all Leaving Certificate Higher and Ordinary Level subjects based on the grades achieved in each subject.
- Points are not awarded for:
 - Foundation Mathematics
 - Foundation Irish
- Points are awarded for the best six subjects.
- The six subjects must be taken at any one sitting of the Leaving Certificate.
- Where applicable the LCVP can be considered for points purposes provided the minimum entry requirements and specific subject requirements are satisfied. LCVP is NOT considered as one of the six subjects for minimum entry requirements.
- An additional score of 25 points is awarded for grades H1 to H6 in Higher Leaving Mathematics. The additional scores are only applicable where it is included as one of the applicant's best six subjects.

Subject combinations for points scores

- Physics and Physics & Chemistry count as one subject.
- Chemistry and Physics & Chemistry count as one subject.
- Physics, Chemistry and Physics & Chemistry count as two subjects.
- Any two or three subject combinations of History, Economics, Agricultural Economics, count as two subjects except when Agricultural Economics and Economics are combined in which case they count as one subject.

Special Mathematics entrance examination

UL holds a special Higher Mathematics Entrance Examination in August each year for students who do not satisfy the maths requirement and who are seeking admission to undergraduate courses in the Faculty of Science & Engineering. Applicants who pass this exam (and who have achieved sufficient CAO points and have satisfied all other entry requirements) are deemed to have satisfied the maths requirement for these courses. Further details including the application process and previous exam papers are available from the Science & Engineering Faculty website. www.scieng.ul.ie
