

BD - SFI Industry Fellowship

BD is looking for highly talented **PhD graduates** to apply for the **SFI Industry Fellowship Scheme**.

The successful candidates will join the Diabetes Care Advanced Technology Team, engaging in exciting and challenging design projects in the areas of:

- **Mechanical Product Design:**

Product design evolution of an on-body insulin delivery patch pump to provide next generation drug reservoirs

- **MEMS Sensor Development:**

Development and characterization of thermal time of flight sensor for drug delivery measurement in a medical device

- **Electronic Product Design:**

Re-architect the electronics and power subsystems in a hand-held medical device to reduce size/form factor

- **Product Architecture & Design:**

Design of a wireless charging station for a durable medical device

If interested please send a mail to john.adams@bd.com for further information by June 26th
