Legal Apps Hackathon [#legalappshackathon](#)

MCCANN FITZGERALD

Building machines
that think, fast

In association with NE  TA LOGIC

The Challenge

This is your opportunity to be part of the future of law! Can you build a machine that thinks, fast?

McCann FitzGerald have teamed up with award winning expert system development platform Neota Logic, to create a first of its kind event in Ireland. If selected to participate at the McCann FitzGerald Legal Apps Hackathon, you'll work on a small team with other students from a variety of schools and a McCann FitzGerald Associate or Legal Solution Architect. You will have 24 hours to design and build an expertise-automation app (rules-based AI application) that provides tailored guidance to users on a complex legal question.

The Location

McCann FitzGerald
Riverside One
Sir John Rogerson's Quay
Dublin 2

Key Dates 2018
